

Odubiyi Success Joshua

Full Stack Developer & Brand Designer

Work Experience

Full stack Developer

Innovations Lab Org, a global tech organization that specializes in providing varieties of online services to users such as crypto, finance and real estate apps

January 2026 to PRESENT

- Developed and currently manage the organization's real estate web application, ensuring reliable performance, security, and an intuitive user experience.
- Designed and implemented new features, optimized system functionality, and maintained the application's frontend and backend to support business operations.
- Currently leading the development of the organization's next digital platform, overseeing full-stack development from planning and system architecture to deployment.

Full stack Developer & Brand Design

Bathom FountainHead Tutorial Hub, an online learning platform dedicated to providing accessible, high-quality educational resources and digital learning solutions to students of all grades and levels

2025 to PRESENT

- Developed and maintain the organization's online learning platform, delivering a secure, responsive, and user-friendly experience for students and instructors.
- Designed and implemented core platform features, including course management, user authentication, and interactive learning tools to enhance digital education.
- Collaborated with stakeholders to translate educational goals into scalable web solutions while continuously optimizing performance, usability, and platform reliability.

Full stack Developer & Brand Design

Full Stack Developer & Brand Designer as a freelancer, delivering custom web & applications, brand identities, UI/UX designs, and digital solutions for clients across various industries.

2023 to PRESENT - Freelancing
